TECHNICAL SKILLS

Backend	NestJS, Node.js, PHP, Laravel, REST API Design, Prisma ORM, PostgreSQL, MongoDB
Frontend	Next.js 15, React, TypeScript, JavaScript, Angular, Tailwind CSS, Shadcn/UI
Security & Auth	JWT, Secure Cookies, Cryptographic OTP, Passport.js, Refresh Token Rotation
DevOps	Docker, Docker Compose, GitHub Actions CI/CD, AWS, Azure, Linux
ML Integration	Python, Flask, Scikit-learn, Pandas — model serving & feature integration

EXPERIENCE

Associate Software Developer (Full Stack) April 2026 – Present
Conceptual Frame *Kathmandu, Nepal*

- Building and maintaining client-facing web applications in a service-based environment using PHP and Laravel.
- Designing system architecture and leading technical design decisions for scalable, maintainable multi-client solutions.
- Developing RESTful APIs and full-stack features across the entire project lifecycle, from requirements to deployment.

Junior Full Stack Engineer (Full-time) November 2025 – April 2026
Ryyft *Kathmandu, Nepal*

- Designed and shipped production-grade RESTful APIs using NestJS, Prisma, and PostgreSQL serving real user traffic at scale.
- Reduced API latency through performance profiling, query optimization, and system monitoring.
- Integrated supervised ML models into backend workflows to power data-driven predictive product features.

Full Stack Developer Intern July 2024 – March 2025
Abblor Tech *Bengaluru, India*

- Built data-centric admin tools using Angular and REST APIs, streamlining operational data reporting workflows.
- Developed modular backend integrations improving maintainability and reducing new engineer onboarding time.

PROJECTS

Aura — Full-Stack Social Media Platform [GitHub](#)
Multi-service architecture containerized with Docker Compose; Python ML classifier, GitHub Actions CI/CD, custom Tailwind + Shadcn/UI design system. *Stack: Node.js, Docker, GitHub Actions, Tailwind CSS, Shadcn/UI, Python*

AuthProject — Production-Ready Auth System [GitHub](#)
NestJS + Next.js 15 monorepo; *Centralized Truth* architecture, cryptographic OTP, JWT + secure cookies with refresh token rotation, forensic audit logging. *Stack: NestJS, Prisma, PostgreSQL, Passport.js, Next.js 15, Docker, Swagger/OpenAPI*

Voice-Enabled OTT Recommendation System [GitHub](#)
Multi-service platform with speech recognition input, collaborative filtering, comparative algorithm evaluation, and Gemini API integration. *Stack: Python, Flask, Node.js, Docker, Gemini API*

EDUCATION

Bachelor of Engineering in Computer Science, CMRIT 2021 – 2025 CGPA: 8.5/10

AWARDS & LEADERSHIP

Finalist, Shristi Hackathon 2024 — Top team; awarded Rs. 50,000 in mentorship & funding. Bengaluru

Secretary, Rise Technical Club (2023–24) — Led AI/ML workshops; mentored 20+ junior members.
